

CALL FOR PAPERS

Special Session “Advanced Software and Information Management for Humans and People”

International Conference on Software Engineering Research, Management and Applications (SERA 2014)

<http://www.acisinternational.org/sera2014/>

August 31-September 4, 2014, Kitakyushu, Japan

Overview:

Advances of computers and networks bring us sophisticated information society. We can communicate with people in the world, and use multimedia data on the web without the recognition of usage of computers and networks. Information system must consider humans and people as well as functions and stability. As software management and information management are important for information system, humans and people must be considered in these managements.

This special session focuses on software design, software evaluation, and software generation of software management from the human-mimetic, emotional, integral, and communicational aspects. Similarly, from these aspects, information retrieval, data mining, and information utilization of information management are treated. Discussion at this session is expected to be valuable for constructing human-oriented and people-oriented information society.
